

Report on Mentor Counseling

for submission to the examination board of the Physics Master programs

Student (Matrikel)	
Study program	
Mentor	

Mentor and student had an in-depth consultation and agreed on the following course outline for the advanced studies during the first year of the Master program.

Elective Theory from the catalog of the program	CP
	10

Additional modules from the Theory catalog may be included as specific special courses.

Physics special courses of 30 CP in total	specific	CP
	<input type="checkbox"/>	
	<input type="checkbox"/>	
	<input type="checkbox"/>	
	<input type="checkbox"/>	
	<input type="checkbox"/>	
	<input type="checkbox"/>	

At least 20 CP of the Physics special courses must be assigned to the study program ("specific").

Usually a broad Physics education is guaranteed by 10 CP from the complementary special courses (modules neither in the specific nor in the Theory catalog). If the above deviates from this rule (more than 20 CP "specific") the mentor hereby confirms that nevertheless a broad Physics education is achieved.

Non-Physics electives of 8 CP in total	CP

Non-Physics electives may be selected from the Master programs of neighboring disciplines regularly (Mathematics and natural sciences and applications of Physics in engineering or medicine). The modules must be included in the catalog issued by the examination board. Only the examination board may decide on the inclusion of additional modules.

Student seminar from the catalog of the program	CP
	4

Furthermore the advanced lab course with 6 CP and modules from the general-education catalog (formerly "Soft Skills") for the Physics programs in total of 3 CP are to be passed.
